Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to a VEGF antisense and method of inhibiting cancer cell proliferation therewith, classifiable in class 514, subclass 44.
- II. Claims 15-17, drawn to a method of assessing the therapeutic potential of a candidate agent to inhibit cancer cell proliferation via contacting cells exhibiting autocrine growth activity with a candidate compound and detecting VEGF expression, classifiable in class 435, subclass 4.
- III. Claim 18, drawn to prognostic assay for a subject afflicted with a disease comprising detecting in a sample VEGF receptor expression, classifiable in class 435, subclass 7.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are different methods with different methods steps where each method results in different ends. The method of Group I, for example results in the inhibition of VEGF expression via antisense inhibition, the method of Group II, for example, results in the identification of potential VEGF inhibitors, and the invention of Group III, for example, results in the prognosis of a subject.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Carol Gruppi on 7/30/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sean R McGarry whose telephone number is (703)305-7028. The examiner can normally be reached on M-Th (6:00-5:00).
